Due Date: **April 11, 2017 (beginning of class)**
Point Total: **10 points**

Generalization Maps

You will create four separate maps of the streets of Sonoma County at different scales. Using the generalization ideas from lecture alter the streets to be appropriate for each scale. ***Be sure to make four unique copies of the streets layer so changes won't show across all maps.*** Here are the maps you will be creating:

1. 1:10,000 scale map for Petaluma area
2. 1:50,000 scale map for Santa Rosa area
3. 1:250,000 scale map for Sonoma County
4. 1:500,000 scale map for Sonoma County

You will turn in the following

1. The four above mentioned maps
2. A brief description of the processes used on the street layer for each scaled map.
